

# Step Two Strike a Pose! Take a digital photograph.

- Refer to the previous slide to help you strike the correct pose.
- Choose one of the five sculptures studied.
- Stand against a plain background with good lighting.
- Have a partner use a digital camera to photograph you holding the pose.
- Now it's your turn. Take a couple of pictures until you're sure you have a good one. Help your partner pose to match the sculpture.
  - Tip: Be careful not to “cut off” the feet or top of the head when you frame the picture in the camera’s view finder.
  - Tip: Use “portrait” framing – hold the camera vertically – for each of the poses shown below.
